PROFILE SUMMARY

Passionate BSc Human Physiology graduate with expertise in human biology and front-end development. I bring a unique skill set, combining analytical abilities from health science with technical knowledge to create user-friendly web applications. With experience in both healthcare and technology, I am eager to contribute to innovative solutions that enhance user experience and improve health outcomes

EDUCATION

Redeemer's University

2019- 2023

- **Bachelor of Science in Human Physiology**
(Second Class Upper Division)

WORK EXPERIENCE

Academic Affair Coordinator

2023 - PRESENT

Registrars office Assistant | Post Graduate School, University of Ilorin

- Assisted in the enrollment process, including application processing and verification of student eligibility.
- Provided assistance to students and faculty regarding registration, transcripts, and academic policies.
- Managed data entry for student information systems, ensuring timely updates and accuracy.

Frontend Advanced Developer | MALHUB, Ilorin, Kwara State

2024

- Engaged in the pursuit of expertise in cutting-edge frontend technologies, encompassing HTML, CSS, JavaScript, and modern libraries/frameworks, with a focus on best practices and industry standards.
- Actively learned and involved in hands-on coding exercises and the creation of prototype applications, facilitating the application of theoretical knowledge to real-world scenarios.
- Learned and Practiced analytical and critical thinking skills through the resolution of intricate coding challenges, employing innovative solutions to address prevalent frontend development issues.

Frontend Developer Intern | OIC HUB, Osogbo

2022 -2023

- Focused on learning and mastering frontend technologies, including HTML, CSS, JavaScript, and relevant libraries/frameworks.
- Worked on coding exercises, small projects, or mock websites.
- Developed problem-solving skills by tackling coding challenges and finding solutions to common frontend development issues.

Intern Physiologist | Uniosun Teaching Hospital

2021 - 2022

- Learned to perform electrocardiograms on patients, ensuring proper lead placement and patient comfort.
- Developed skills in interpreting ECG readings, recognizing normal and abnormal heart rhythms, and identifying signs of cardiac distress.
- Enhanced patient communication skills, delivering explanations and comfort, which led to improved patient satisfaction scores.
